About Us

S2DiO was founded by a group of seasoned professionals who shared a vision to set up an international standard design/IT firm. Hence in 1998 S2DiO was established. It has witnessed a gradual progress ever since.

In line with its tradition of exploring the unexplored S2DiO has undergone an identity-evolution from an inspiringly creative to an incredibly successful business concern. Initially, S2DiO had designed and multimedia as its core, today S2DiO is also offering high-end and web-related services.

Uncompromising commitment and sheer hard work have worked magic for S2dio. Today, S2DiO has sizeable international clientele with prospects beyond imagination.

Our Services

S2dio serves a diversified clientele ranging from industry to trade and services. S2dio understands that today's businessman has to manage costs, fluctuations, and technology besides the conventional issues related to sales, management, and finances etc.

And this is where S2dio comes to your rescue. We have expertise and the knowledge that may help you counter these modern day business challenges and survive with grace.

Our experts have deep industry knowledge, round-the-clock business updates and they use this information for extensive research and incisive analysis to design technology-based, high-notch business models and services which help your business grow even in the most hostile of the environs.

Web design & Development on Open Source Platform Microsoft Dot Net, C# and SharePoint Application Development i-Phone, i-Pad & Mobile Application Development Android, J2MEE Application development Custom Application Development, Consulting, Application Management, Business Intelligence Independent Testing & QA

Hampshire i-Pad Application

Scope Of Work

Problem Areas Faced by the Client

There was an already existing website, but that was not a good tool to reach to the potential IOS customers.
Only some of the properties shown in the website, but most of the customers were asking the client for a perfect i-Pad application

Solution Offered

We have offered to integrate the existing data from the website and to showcase them in the i-Pad application

Project Details

This is the perfect Real estate i-Pad application to get access to an exclusive collection of properties. Hampshire is leader in commercial real estate services. This app allows you to browse the latest available properties and all their detailed information like site maps, floor plans, reports, location, brokers, amenities and any other resource that will make the users search experience easy.

Accu-Mile i-Phone Application

Scope Of Work

Problem Areas Faced by the Client

The client wanted to showcase the most advanced mileage and expense tracking application available on the market today. This sort of functionality was not there in the i-Tunes like Accu-Mile before

Solution Offered

The full-featured version of the app supports expenses, identifies frequent destinations, saves specific cars used, suggest areas of interest, displays odometer and distance readings, car specifications, and exports all of this information via email for business tax and car maintenance purposes.

Project Details

The easy-to-use interface is ideal for both business and consumers who wish to not only find their destination through its GPS capabilities, but is also a fantastic tool for companies wishing to keep track of business costs. The visual panache of Accu-Mile highlights sets it apart from the competition. This is a mileage tracker application that both functions well and gets the job done.

Work By Our Team
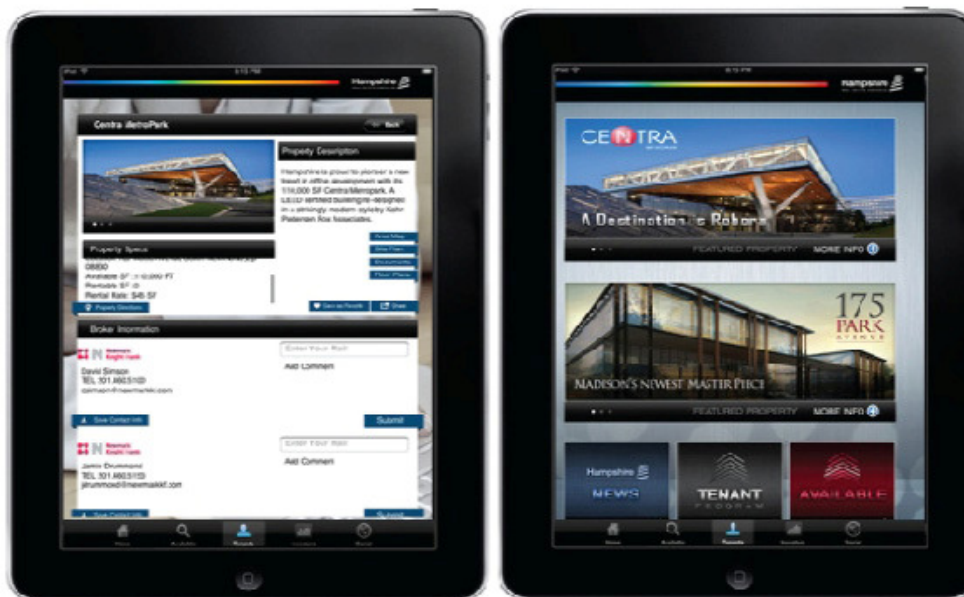

* Entire Graphic design and Screen Designs
* Development of the i-Pad application using Xcodes
* We have developed the web-services in XML

Humidity Calculator Application

Scope Of Work

Problem Areas Faced by the Client

The client did not have a professional calculator application in the i-Tunes.

Solution Offered

By implementing mathematical Logic and professional graphic designs, we have achieved, what was targeted by the client.

Project Details

Development of a calculator where it calculates the relative humidity, Absolute Humidity, Mixing Ratio, Moisture in Gases & Moisture in Liquids. It depends on the Dew-Point Temperature, Pressure and others. There are three or four blank fields in every page where we need to fill two or three fields and the result shows in the blank field.

Work By Our Team

- ❖ Entire Graphic design and Screen Designs
- ❖ Universal App Development using Xcodes.
- ❖ The Universal app will work equally good in all IOS devices.

10x Maastricht i-Phone Application

Scope Of Work

Problem Areas Faced by the Client

The client was in need to launch a Travel guide which would feature the best things to see and do for a particular area(s) within a city. He also needed the application to have the option, where the users would be able to choose from selected categories and recommended listings, then browse locations, and photos for sights and attractions. Good database compatibility between the web database and the I-Phone application was also needed by the client

Solution Offered

By implementing Extensive Logic on xcodes and full GPS functionality, we have achieved the result required by client. There was also major work within the PHP web admin panel and web database.

Your Technology Partners   S2DiO Technologies (Pvt.) Limited.

Project Details

10xMaastricht is an Exclusive Travel Guide, featuring the best things to see and do in Maastricht Fun and easy to use, this Travel Guide includes ten pre-selected categories and many recommended listings, one-click phone contacts, email, websites, locations, maps, photos, searchable listings, postcards and more. Kosair i-Phone Application

Scope Of Work

Problem Areas Faced by the Client

The client wanted to launch an i-Phone application to raise awareness for all of the wonderful programs of their non-profit organization. The client also wanted to display news and events through the I-Phone application, as well as learn about the history of Kosair Charities and donate to this great cause. Good database compatibility between the web database and the I-Phone application was also needed by the client.

Solution Offered

Our Programmers integrated the existing data from the website to showcase them in the i-Phone application. Also, by implementing Extensive Logic on xcodes, we have achieved the result required by client. There was also major work within the PHP web admin panel and web database.

Project Details

Kosair Charities mobile application for the i-Phone is designed to raise awareness for all of the wonderful programs of our non-profit organization. This mobile app allows the socially conscious members of our community to donate and volunteer their time to this life-changing charity. Every day, Kosair Charities helps children receive the medical care they need to be able to walk, run and dance. Kosair Charities believes one healing step can lead to one more, and one smile can lead to joyous laughter. It is because of Kosair Charities caring efforts that thousands of Kosair Kids are able to do what they can do. And, just like all kids, they have dreams to pursue. Kosair Charities has helped hundreds of thousands of children with a variety of illnesses and medical conditions-either individually or through one of its granted organizations.

Battle of Atlantic Game Application

Scope Of Work

Problem Areas Faced by the Client

The client wanted to launch an excellent i-Phone Game based on the longest continuous military campaign during the World War II over the Atlantic. The client wanted to showcase extensive use of animations throughout the game application

Solution Offered

Our Programmers worked very closely with the client by understanding the Game Logic. The graphics were at-par with the client's requirements and it has been doing very well in i-Tunes. Our 2d animators gave an excellent animation for the entire game application.

Project Details

Battle at the Atlantic application is based on the longest continuous military campaign during the World War II over the Atlantic. The convoys were coming mainly from North America and the South Atlantic and going to the United Kingdom and the Soviet Union, were protected for the most part by the British and Canadian navies and air forces. These forces were aided by ships and the aircrafts of the United States.

Features

Real Sound - (Alarm, Crew, Explosion, etc.) Radar – Makes sure that you find your enemy. Red Led - They are on your radar range. Green Led - The allies are close to protect the fleet. LCD Counter - After five will fire up against the enemy. LCD Monitor - Gives you all the important information about them. Peak Meter 2 units (Green/Yellow/Red) - If they are close, you will find them. 2D/3D Graphics/Chart - Searching for submarines in the deep sea. Red Button - Fire the torpedo against the enemy in the count of five.

Work By Our Team

❖ Entire Graphic design in 2d and Screen Designs.
❖ Entire Animation of the Gaming application.
❖ I-Phone App Development using Xcodes and Cocoas 2d.

Impulse- The Drinking Game

Scope Of Work

Problem Areas Faced by the Client

The client wanted to launch an excellent I-Phone Card Game with Unique Logic. The client wanted to link the Card Game Logic with Drinking which has been very innovative idea for IOS Games.

Solution Offered

Our Programmers worked very closely with the client by understanding the Game Logic. The graphics were at-par with the client's requirements and it has been doing very well in i-Tunes.

Project Details

"Impulse" requires quick wit, a moderate vocabulary, and a high tolerance...... for FUN!!! Grab some drinks and sit around a table. The app will select two players to compete head-to-head and a card (or other image) will appear on screen Each player must say the first word that comes to his/her mind that BEGINS WITH the same letter as the image on the screen. (For example, if the Two of clubs is shown, the first player to blurt out a word that starts with a "T" is the winner of that round.) And then of course... the loser drinks! But "Impulse" isn't just a card game. Choose from several categories such as animals, colors, shapes, fruits, and more. The "scoreboard" feature automatically keeps track of exactly how many drinks each player has had.

Features

Real Sound - (Alarm, Crew, Explosion, etc.) Radar – Makes sure that you find your enemy. Red Led - They are on your radar range. Green Led - The allies are close to protect the fleet. LCD Counter - After five will fire up against the enemy. LCD Monitor - Gives you all the important information about them.
